

Ideas for genomics project: option on your own genome [SafeGenome\GenomeLegal].

In a series of posts tagged with [ideas-for-genomics-project](http://scalaakka.blogspot.com/search/label/ideas-for-genomics-project) [http://scalaakka.blogspot.com/search/label/ideas-for-genomics-project] I am describing ideas for business that can be build in area of genomics. If you like those ideas and you would like to join as an investor, co-founder or consultant please contact me at LinkedIn [https://pl.linkedin.com/pub/artur-stanek/a5/643/691] or just drop me an email, stanek.artur@gmail.com [mailto:stanek.artur@gmail.com] .

You may be also interested to check previous post "Check if your genome is in the Internet [http://scalaakka.blogspot.com/2015/11/ideas-for-genomics-project-check-if.html] ", next post "Genome meta information [http://scalaakka.blogspot.com/2015/11/ideas-for-genomics-project-genome-meta.html] " or the bigger picture [http://scalaakka.blogspot.com/2015/10/ideas-for-genomics-project-diagram-of.html] .

Idea "GenomeLegal" is about company that will serve legal services.

One of the first legal tool should be a protection that your genome is only ours, worldwide, even if not sequenced yet.

There are many countries and unions and I am sure that they all will introduce or adopt legal regulations over genomes. With different speed. Different regulations with different speeds in different countries.

Who then will protect you in one, consistent way? Who will be on your side? Does your genome belongs to you ... in all countries? What about those exotic holiday trips that you take from time to time? Can your biological traces be used without your knowledge there?

Specialized company/product should allow you to buy **option on your own genome**. No matter how crazy it sounds today. Even if you are not planning to sequence yourself in next few years it may be good to say that your genome is only yours. That you have full rights to it and there is company that protects and represents you.

Once you will sequence yourself [GenomeTracker](http://scalaakka.blogspot.com/2015/11/ideas-for-genomics-project-check-if.html) [http://scalaakka.blogspot.com/2015/11/ideas-for-genomics-project-check-if.html] can search the web. It would be a big surprise if it would find your genome on a web page written in language of a country ... that you visited few years earlier. In that case legal actions should be taken.
